## Want to learn about reasons why you stop eating?

If you are an adult with these interests, this research study may be for you.

<http://www.umpmr.med.miami.edu/research>

## Study Information

- Why do people stop eating after a meal?
- This research survey aims to explore the different reasons individuals with a spinal cord injury stop eating compared to individuals without a spinal cord injury.

## Eligibility

- Adults, 18 years and older
- Persons with a spinal cord injury
- Persons without a spinal cord injury
